

**REPRESENTATIVE DRIEHAUS WELCOMES HHS FUNDING
FOR UNIVERSITY OF CINCINNATI**

WASHINGTON, DC—Representative Steve Driehaus today welcomed an announcement by the U.S. Department of Health and Human Services (HHS) of two grants totaling \$762,956 for the University of Cincinnati. The funding will be used to support research efforts at the university.

“This is a smart investment in the University of Cincinnati and in our community. It is critical that we support our universities and research centers, and these grants will help ensure that U.C. has the resources it needs to continue its important work,” said Rep. Driehaus.

Two HHS grants will support research projects at the University of Cincinnati. A grant of \$437,605 will support a project entitled “Brainstem Mechanisms of Stress Regulation,” directed by Dr. James Herman of the Department of Psychiatry. A grant of \$325,351 will support a project entitled “Age effects on liver inflammation and injury,” directed by Dr. Alex B. Lentsch of the Department of Surgery.
